PROFESSIONAL SUMMARY

Result driven Software Developer with hands-on experience building full-stack web applications and cross-platform mobile solutions. Proficient in Java, JavaScript, Kotlin, Python, and C#, with expertise in React, Spring Boot, and REST API design. Demonstrated ability to independently deliver complete software products from architecture to deployment, while effectively teaching programming concepts to students across skill levels.

TECHNICAL SKILLS

Languages: Java, JavaScript, C#, Kotlin, Python, SQL, C++, HTML/CSS

Frameworks & Libraries: Spring, React, Angular, React Native, Kotlin Multiplatform (KMP)

Databases: PostgreSQL, MySQL — schema design, query optimization, REST-integrated data persistence

DevOps & Tools: Docker, Docker Compose, Git, GitHub, GitLab, Gradle, Node.js, Cloudflare Tunnels

Competencies: REST API Design, Agile/Scrum, Cross-platform Development, CI/CD Pipelines, OOP

PROFESSIONAL EXPERIENCE

Code Coach | The Coder School | *Tempe, AZ* | *Dec 2025 – Present*

- Instructed 15+ students per week in programming fundamentals through advanced concepts across Java, Python, JavaScript, and web development technologies including React and MySQL.
- Rigorously troubleshooted alongside students to teach efficient error management
- Designed and delivered customized lesson plans covering Computer Science principles, data structures, algorithms, and full-stack web development for students aged 8–18.
- Maintained 100% session attendance rate with strong student rapport and engaging, goal-oriented instruction.

Software Developer (Self-Employed) | Mintricity LLC | *Gilbert, AZ* | *Aug 2025 – Present*

- Architected and shipped 2 cross-platform mobile applications using Kotlin Multiplatform (KMP) and React Native, published to both the Apple App Store and Google Play Store.
- Built and deployed 3+ production full-stack websites leveraging React (frontend) and Java Spring Boot (backend) with PostgreSQL databases, serving real end users.
- Designed RESTful API services handling all CRUD operations for database communication, achieving consistent response times under normal load.
- Reduced deployment complexity by containerizing applications with Docker Compose, enabling reproducible builds and one-command deployments.

PROJECTS

Full-Stack Media Ranking Platform [GitHub](#) | [Website](#)

- Engineered a full-stack media site using React, Spring Boot, and PostgreSQL with a RESTful API backend, supporting user-contributed media rankings viewed by 50+ unique visitors since launch.
- Implemented a dynamic media ranking system allowing all users to submit and view ratings, with forward/backtracking playback and seamless media serving.
- Containerized the complete application with Docker Compose and configured Cloudflare Tunnels for secure, zero-cost deployment.

Kotlin Multiplatform To-Do List App (iOS & Android) [GitHub](#) | [Appstore](#) | [Playstore](#)

- Independently planned and delivered a complete cross-platform mobile application using Kotlin Multiplatform within a 1-month self-imposed deadline — published to both App Store and Play Store.
- Implemented local data persistence enabling a recurring errand scheduling feature.
- Designed an intuitive friendly UI

EDUCATION

Bachelor of Science, Computer Science — *Western Governors University* | *March 2025*

Associate of Science, Computer Science — *Chandler-Gilbert Community College* | *December 2024*

- GPA: 3.5 | Phi Theta Kappa Honors Society
